

Sessions

SESSIONS

Keynote

Malin Dandenell

Day 1: 11:30-12:10

The development and future of the Office 365 platform – living in a changing world
Collaboration and security – the most discussed topics among our clients right now. In the light of the recent events in public sector – how does an organization or company protect it's data and what to consider when GDPR is around the corner.

Where is the 365 platform heading?

PowerShell with Office 365 and Azure

Todd O Klindt **Level: 300**

Day 1: 12:20-13:20

PowerShell has been the on-prem SharePoint Admin's best friend for 7 years now. It hasn't let us down yet. With migrations to Office 365 and Hybrid topologies being all the rage these days it's time to expand our PowerShell prowess to the online world. In this session Todd will show you PowerShell techniques to use in your online and Hybrid environments. He'll cover managing Azure and SharePoint Online using the cmdlets provided by Microsoft. This will be tasks like user creation, license management, and site creation. Then he'll show you how you can roll your own PowerShell to fill in the gaps and other tools that will expand your capabilities with PowerShell in Office 365. When you leave this session you will have another set of tools in PowerShell arsenal and the confidence to use them.

Automating Your Work with Microsoft Flow

Laura Rogers **Level: 200**

Day 1: 12:20-13:20

Have you been using SharePoint workflows, and now you are wondering what to think about Microsoft Flow? This session covers the creation of flows in Office 365, with specific examples of integration across line-of-business systems and SharePoint / Email. This session also includes specific examples and demonstrations of translating business processes from SharePoint Designer workflows to Microsoft Flow. Come learn how to get around in the interface, what actions are available, how to troubleshoot, what are common integrations across multiple servers and systems, and even the pros and cons of moving to Microsoft Flow.

Experiences as an Evergreen Manager for Office 365 at H&M

Jenny Florin **Level: 100**

Day 1: 12:20 - 13:20

Almost every week, there is new and enhanced features, released in Office 365. It is a challenge to keep up with all this news. Do you need the new feature? How should to evaluate it? How should it be implemented? These are questions Jenny has been responsible for, at H&M's worldwide implementation of Office 365 - Her title is "Evergreen Manager".

SESSIONS

Azure 101 and using an Azure VM to administer Office 365/SharePoint Online

Penny Coventry **Level: 200**

Day 1: 14:10 - 15:10

You may have attended Todd's "PowerShell with Office 365 and Azure", however your organization does not allow you to install software onto your machine, so you can't use the knowledge from Todd's PowerShell session. You may be in the same situation if you are a developer or IT Pro, where you can't install or don't want to install software onto your machine. In this session Penny will show you how to build in Azure a Windows Server virtual machine that you can use as a your Office 365/SharePoint Online administration machine.

Are you new to Azure? Does building an Azure VM frighten you? Don't worry Penny will start the session by explaining some of the acronyms, such as the differences between IaaS, PaaS, SaaS, and how Azure relates to Office 365. In the second part of the session she will go through the steps of how to get an Azure account and will also provide step-by-step instructions on how to build an Azure VM.

Modern Collaboration - A new way of working

Malin Dandenell **Level: 200**

Day 1: 14:10 - 15:10

Office 365 ger oss många nya möjligheter och best practice för samarbeten och dokumenthantering. Varför ska man välja Office 365 och vad kan man göra och varför finns både Teams och Groups. Malin går igenom de möjligheter som Office 365 erbjuder, samt berättar om Microsofts "Road map", dvs vad som kommer.

Workflow Best Practices: Product-Independent Project and Design Advice

Mike Fitzmaurice **Level: 200**

Day 1: 14:10 - 15:10

It doesn't matter if you use SharePoint Designer, Flow, Logic Apps, Nintex, K2, or anything else: several truths are evident about what kind of problems are best addressed by workflow, when to attempt to do so, how go about it, how to measure success, how to model processes, pros and cons of different workflow engines, and more. This session will pack as much advice as possible to the allotted time to give you take-away advice on how to succeed in process automation.

The Day After: A Post-Deployment SharePoint Survival Guide

Eric Shupps **Level: 200**

Day 1: 15:20 - 16:20

It takes a great deal of effort to plan, design, install, configure, test and deploy SharePoint in the enterprise. But that's only the beginning - now the real work begins. In this session you will learn how to apply proven techniques for enterprise application lifecycle management, create a center of excellence for ongoing service improvement, apply industry

SESSIONS

An End User's Guide to Working with Power BI

Christina Wheeler **Level: 200**

Day 1: 15:20 - 16:20

In today's world, the growth of data is increasing each day as so does the need for self-service business intelligence. Microsoft Power BI for O365 is a collection of powerful features that enables the ability to find and visualize data, share discoveries, and collaborate in intuitive ways. As there are many roles with working with Power BI this session focuses on the capabilities and features targeted for the end user/report creator. If you work with Excel, you easily work with Power BI to turn data into decision-ready insights. In this session, you will learn the basics of Power BI as well as demonstrate working with content packs beyond Excel.

How to build an internal team for taking advantages of Office 365

Anne Setterwall **Level: 100**

Day 1: 15:20 - 16:20

So you got Office 365 - now what? With all the features available, and new ones coming regularly, the potential for building smart business solution within your organization is almost endless. Anne is responsible for building such a team, "Center of Excellence" at H&M, and she will explain how to market these resourced within the organization, how to assess the requirements, and how to find a solution, using internal resources, and external when needed.

Practical Advice to Overcome User Adoption Hurdles for Office 365 and SharePoint

Susan Hanley **Level: 200**

Day 1: 16:40 - 17:40

Are you wondering how you can jump start your SharePoint or Office 365 initiative? Curious about how best practice organizations are engaging users to drive successful adoption? Wondering what you can do to make sure that your solution gets adopted? This session will show you how to unlock the key secrets to user adoption success. You will learn:

- Practical and creative examples from multiple organizations of user adoption strategies that worked (and a few that didn't!)
- Why it is important to invest in user adoption planning to achieve your solution objectives – and how to "sell" this message to your executives
- Critical elements for user adoption plan
- How to make sure that if you build it, they WILL come.

Aldrig mer ransomware - en djupdykning i ATP

Magnus Björk **Level: 300**

Day 1: 16:40 - 17:40

En av de största utmaningarna som finns just nu är ransomware eller kryptering av din dator och din data, här visar Magnus det senaste Advanced Threat Protection och Office 365 kan göra för dig. Allt kombinerat med massor av erfarenhet från uppdrag på fältet! Du kommer få se hur du med hjälp av Office 365 och funktionerna där ser till att du är skyddad, inte bara i din epost men även dina filer osv.

SESSIONS

OneDrive for the SharePoint Administrator

Todd O Klindt

Level: 200

Day 1: 16:40 - 17:40

What exactly is OneDrive and why are there so many of them? These are the questions that vex the modern-day SharePoint Admin. In this session we'll start by breaking down exactly what OneDrive is. Then we will cover which OneDrive features impact on-prem SharePoint farms as well as their SharePoint Online counterparts. Then we'll finish up going over the sync client and what control admins have over it. You may be frightened and confused about OneDrive now, but after this session you will appreciate it for the tool that it is.

Introducing Logic Apps

Penny Coventry

Level: 300

Day 2: 10:10 - 11:00

You may have been using SharePoint Designer to automate business processes, and you may have started to use Microsoft Flow to build similar process. With both SharePoint Designer and Microsoft Flow you may reach a limit as to what you can automate, so what is the next step? With SharePoint workflows you get would get in a developer, similarly with Microsoft Flow, you would get a developer in if you can't achieve everything you want - but this time your developers would use Logic Apps. In this 20-75 minute session, Penny introduces Logic Apps and how to get started.

Knowledge Management and Office 365: What's Possible, What's Transformative, and What You Need to Know

Susan Hanley

Level: 200

Day 2: 10:10 - 11:00

SharePoint is part of many knowledge management solutions in organizations all over the world. When you use SharePoint with Office 365, you have the potential to transform the way your organization connects and collaborates in ways that have not been possible in the past. But there are a lot of choices – modern vs. classic team sites, Teams, Groups, Yammer, and Delve – and the degree of maturity for each capability is different (and evolving) – especially when it comes to KM. If you are wondering how you can best enable your KM objectives with Office 365, this session is for you! You will learn how you can leverage the current capabilities of Office 365 to capture, share, retain, and transfer organizational knowledge. You will take away practical advice about what's real, what's promised, and what you need to know when it comes to Office 365 and knowledge management – so you can make the best decision about when to adopt and how to deploy.

DMARC, DKIM och SPF – vad är allt detta och varför berör det oss?

Magnus Björk

Level: 300

Day 2: 10:10 - 11:00

Sedan internets födelse, eller åtminstone sen barnsben, har vi skickat epost. Tyvärr tänkte man inte på vilka risker detta medför i modern kommunikation. Under denna session får du veta vad du behöver göra och varför detta är viktigare än någonsin för att skydda din kommunikation – och dina pengar!

SESSIONS

Translating your InfoPath Forms to PowerApps

Laura Rogers

Level: 200

Day 2: 11:15 - 12:05

For 13 years, InfoPath has been Microsoft's official method of creating business forms in SharePoint. Now that InfoPath has been phased out, PowerApps is the new way of creating no-code forms. In this session, Laura Rogers will introduce how to create PowerApps, and specifically how to translate your common InfoPath forms into the new way in PowerApps.

SharePoint hosted Add-Ins

Christian Ståhl

Level: 200

Day 2: 11:15 - 12:05

I denna session kommer du lära dig att bygga SharePoint hosted add-ins med hjälp av Visual Studio och kunna publicera dem till SharePoint Online. Vi kommer också titta på några lämpliga ramverk och plugins och hur de kan integreras i din Add-Ins. Jag kommer visa några 'real world Add-Ins' som byggts i mina kunduppdrag. Samtliga exempel med kod kommer du att kunna ladda ner efter sessionen.

From Zero to Hero: A Real World Guide to Building Highly Available Fault Tolerant SharePoint Farms

Eric Shupps

Level: 300

Day 2: 11:15 - 12:05

Building SharePoint farms for development and testing is easy. But building highly available farms to meet enterprise service level agreements that are fault tolerant, scalable and connected to the cloud? Not quite so easy. In this workshop you will learn how to plan, design and implement a highly availability farm architecture based upon proven techniques and practical guidance.

The Lay of the Land of Client Side Development circa 2017

Marc D Anderson

Level: 200

Day 2: 12:10 - 13:00

Are you dazzled by all the noises you hear about client-side development? In this mid-level session, we'll talk about the types of things you can do with client-side development, how SharePoint can be used as a service (SPaaS?), and what the popular toolsets are. Whether you're a server-side developer who wants to catch up with the new trends, a power user wanting to flex your muscles in new ways, or an end user who would like to speak more intelligently with IT, this session will provide useful foundational information as well as open your mind to new possibilities.

SESSIONS

Configuring Active Directory replication with Azure AD

Todd O Klindt

Level: 300

Day 2: 12:10 - 13:00

The first step to doing hybrid SharePoint is getting your users into the cloud. However, for those of us that were primarily on-prem admins it can be daunting knowing where to start and where to go once you get there. In this session Todd will show you the tools you need to get your Windows Active Directory synced up to Azure AD, and what to do with them once they're there. He'll walk you through the process from start to finish, so you'll know exactly what to do. He'll even help you set up an environment where you can try it yourself without much cost or risk. There will be boring talking, exciting demos, and several stories of Todd screwing things up. If you're going to be exploring Hybrid scenarios with SharePoint or Exchange, you won't want to miss this.

SharePoint Framework, one year later

Victor Wilén

Level: 300

Day 2: 12:10 - 13:00

The SharePoint Framework has been around for about a year. What has happened? We'll take a look at the new features that have been introduced in the SharePoint Framework that allows you to build even better extensions to SharePoint, beyond the client-side Web Parts. Be prepared for a code intense session, that will make your sea sickness go away!

Monitorering av Office 365 aktiviteter

Göran Husman

Level: 200

Day 2: 14:00 - 14:50

Office 365 ger användarna möjligheter som de inte haft tidigare, så många ansvariga och administratörer blir oroliga och vill läsa ner möjligheterna. Vanliga frågor är -"Vem delar dokument med externa personer? Vem laddade ner filen med kundregistret?" Den här typen av frågor och monitoreringar är svåra att hantera i en klassisk on-premise lösning, men i Office 365 finns mycket kraftfulla verktyg för just detta. Göran visar vad man kan göra och hur effektivt det är för att få koll på användarnas aktiviteter.

Introduction to Azure Web Applications for Office and SharePoint Developers

Eric Shupps

Level: 300

Day 2: 14:00 - 14:50

The Azure platform offers many opportunities for developers to build robust, cloud-first applications that integrate directly with Office 365. Learn how to leverage the power of the Microsoft cloud infrastructure to create solutions with fully-integrated single sign-on and authorization. Discover tips and tricks for rapidly building, deploying and managing Azure solutions, along with techniques for leveraging the Office 365 API's from your cloud applications.

SESSIONS

Identiteter i Office 365 – Myter och sanningar, tips och fallpropar

Fredrik "DXter" Level: 300

Day 2: 14:00 - 14:50

En session om hur identiteter i Office 365 fungerar "på riktigt". Hur ska man göra för att det ska bli bra? Vad är dom vanligaste misstagen folk gör? Hur minimerar man arbetsinsatsen genom att vara smart i förväg? Hur fungerar allting rent tekniskt? Hur sköter man samexistens på ett bra sätt med existerande AD? Detta och en hel del andra frågor kommer vi gå igenom i denna otroligt fakta och demofyllda session som inte lämnar en enda fråga obesvarad. DXter har pillat med identiteter i Office 365 och Microsoft Online Services långt innan Office 365 var färdigt och det finns få människor i världen som har jobbat lika mycket och renodlat med identiteter i Microsoft Online Services som honom.

Building Single Page Applications (SPAs) in SharePoint with JavaScript

Marc D Anderson Level:300

Day 2: 14:55 - 15:45

While the SharePoint Framework (SPFx) matures, we can continue to build Single Page Applications (SPAs) using lists and libraries for our data model, building with AngularJS, and deploying using Webpack and gulp-spsave. While this approach doesn't utilize SPFx yet, you can build in such a way that you are ready when SPFx gives us the capability to take over an entire "modern" page

Make Microsoft Teams even better with Microsoft Teams Apps

Victor Wilén Level:300

Day 2: 14:55 - 15:45

This session for developers, and anyone interested in the capabilities of Microsoft Teams, will show you how to make Microsoft Teams even more useful for your organization with Microsoft Teams Apps. Learn how to customize Microsoft Teams using Bots, custom tabs, connectors and more. All of this using modern technologies such as TypeScript, node.js, Azure and more.

Office 365 Backup and How to Control Your Data

Thomas Heinz Level:200

Day 2: 14:55 - 15:45

Why is it important to have a backup strategy in place for Office 365 when Microsoft keeps the risks to a minimum with highly available data centers and excellent Service Level Agreements anyways?

Despite the vast built-in capabilities that Microsoft offers, many customers still need more to match their specific Cloud backup needs. In this session, we will get an understanding of what Data Governance in Office 365 means and what extended possibilities there are to build an individual Cloud backup strategy.

SESSIONS

Client Side dev tips & tricks

Christian Ståhl **Level: 200**

Day 2: 16:00 - 16:50

I denna session kommer Christian visa ett antal olika tekniker och verktyg inom client side utveckling inom SharePoint Online för att lösa vanliga behov kunderna har på gränssnittet

vad det gäller framtagning av webparts, funktioner och webbdesign. Du får se ett antal kundexempel och vi diskuterar de olika metoderna och verktygen som finns, t ex

- CEWP med REST eller JSOM
- CSWP och display templates
- JS injection
- Add-ins
- masterpages, pagelayouts och css filer
- design manager
- SharePoint framework

Workflow Solution Design: Put the Process First

Mike Fitzmaurice **Level: 200**

Day 2: 16:00 - 16:50

Data and user interfaces are important, but when designing a process-based solution, it's the process that informs what data is needed and what users need to see/do. Data-centric and process-centric apps each have their places, but the rules are different, and this session will spell them out – with use cases and examples.

Making the Most of SharePoint Search

Christina Wheeler **Level:200**

Day 2: 16:00 - 16:50

Search in SharePoint 2013/2016 and SharePoint Online is very powerful and greatly improved from previous versions of SharePoint. However, just implementing search out-of-the-box without making any customized configurations really doesn't leverage search to its fullest potential. In this session, we will take a deep dive into SharePoint on-prem/SharePoint Online search and demonstrate what configurations and customizations can be done to provide much better search results and a better user experience for your users. This session will focus on working with managed properties, custom result sources, advanced queries, as well as demonstrate using display templates to create cool jQuery sliders as well as transform calendar items and other data on a page.

Round table discussions

Day 3: 16.00-17:30

Photo opportunity

Day 3: 17.30-18.00

All the speakers will gather up for a photo opportunity.
